Summary

Since I wanted a skill that gives me more options in my life, I got interested in programming when I was in high school in Japan. I decided to enroll in DigitalCrafts which is a coding boot camp located in Houston TX. The reason I moved to the US was that I can learn not only coding but also English which is the base language for programming.

Projects

Project: Pokemon_Arena(DigitalCrafts)

Pokemon_Arena is a turn based Pokemon battle simulator. This was my first front end(HTML, css, java script) project at DigitalCrafts. My main task was to design the layout set up the basic events.

project: Wementor(DigitalCrafts)

WeMentor is a full stack application built to help teachers connect their students with mentors. The goal was to create a platform where we could assist student's reach their professional goals.

Education & Experience

18/03/2019 - present
